

# Surface Inflatable Target (SIT)

## Inflatables

**MAAN Surface Inflatable Target (SIT)** is designed for ease of unpack, inflate, deploy and recover. SIT balloons feature with target practicing requirements. Once the SIT is filled the centre weight of the water holds the target upright and reduces the influence of wind helping the target holds station.

### Salient Features

Parameter	MAAN SIT
Air pockets material	PVC Red film
Base material	PVC Red film
Pouch inner layer reflector	Radar Reflective Foil (RRF)
Design	Target size 6ft x 6ft x 6ft & recovery compartment of 1ft height or as per Customer's requirements

### Applications

- ▶ These are required by marine, Navy and Coast guard units to maintain a state of readiness in target acquisition and gunnery skills.
- ▶ Surface targets made from vinyl film are relatively light weight, easily stored due to small deflated size, inflated from any powered air blower and deployed by just a few personnel.
